

Scarecrow Arduino

You can use our program to keep pests away from your lovely garden ☺

Description

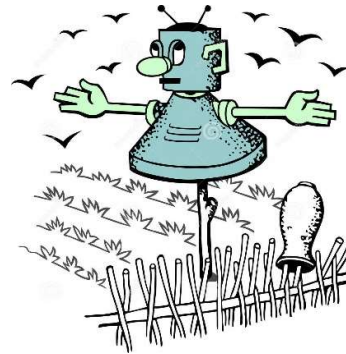

To use the system all you need to do is to connect the Arduino to your computer. The Scarecrow will recognize a movement of pests in the distance of 4 meters and will execute several actions to keep them away!

Getting Started

Dependencies

- Arduino IDE

Installing

For further information, use the link attach below- <https://docs.arduino.cc/software/ide-v2/tutorials/getting-started/ide-v2-downloading-and-installing>

Executing program

- Open the Arduino IDE Program -> click "file" -> click "open" -> choose the file from the relevant folder on your computer -> connect the Arduino Uno device by USB -> click "verify" button  -> click "Upload" button 

Help

- Please note, the scarecrow has small and moving parts so keeps infants and children away.
- In addition, be aware, there is some load noises and flickers.
